

BCF HEAT EXCHANGERS

Exchanger Type:

Straight Tube

Fixed Tubesheet

Advantages:

Less costly than removable bundle exchangers.

Provides maximum heat transfer surface area per given shell and tube size.

Easily interchangeable with designs of various manufacturers.

Flanged lip baffles ensure close tolerance, high efficiency and additional tube support.

Enlarged bundle entrance area of hub/tubesheet design lowers entrance velocity and pressure loss.

Tube side can be steam or mechanically cleaned.

Only tube side fluids exposed to gaskets.

No packed joints.

Limitations:

No provision for differential expansion of tubes and shell.

Shell side may not be mechanically cleaned.
